To whom it may concern:

I am asking for an opinion on the subject of me accepting a position of employment with a private engineering consultant. I am currently an Engineer 6 in the bridge maintenance section for DOTD. I have been in this position for almost 2 years. I oversee the QC inspection of in-service bridges that meet the FHWA requirements of being a structure, manage underwater consultant contracts, and aid the district offices in bridge maintenance related activities. If I were to accept a position working for a private consultant would I be able to perform work for LADOTD on bridge inspection related activities as long as it is not involving any contract work that I currently work on? The consultant in question is currently not the prime consultant on any DOTD bridge maintenance contracts.

Thank you for your help regarding this matter,

Bradley Mistich

Engineer 6
